DETAILED ACTION

Status of Claims

Claims 1-7 and 9 are allowed.

Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the closest prior art is considered to be the solid support-linker-SO₂-O-tracer compound shown on page 8 of Luthra (WO 03/002157). Considering polystyrene as solid support in the Luthra compound, the compound differs from the claims in that, in the instant claims n has an integer value from 2-20, but corresponds to a value of 1 in the linker disclosed by Luthra, as well as an alkylated amide in the linker portion of the Luthra reference, whereas the instant claims require hydrogen. The differences in the claims and the reference compound are non-obvious in view of unexpectedly superior results shown on page 37 of the instant specification, in which the effect of increased carbon chain length in the linker corresponds to significantly increased radiochemical yield.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
